## SUMMARY

Greetings! I am a highly confident and experienced MERN stack developer with an expert understanding of various frameworks and tools. I take pride in developing dynamic and adaptable websites that not only attract users but keep them engaged. My ability to learn new knowledge and skills quickly is unmatched, and I thrive in collaborative environments where I can work with others to produce exceptional applications. If you're looking for a developer who can confidently deliver top-quality work, look no further.

## SKILLS

**Languages:** C++, Python, JavaScript, TypeScript, SQL.

**Technologies:** React Js, Next Js, Express Js, Node Js, Sanity.io, Tailwind Css, MongoDB, Firebase, S3 Bucket, Multer, Stripe, Socket.io

**Soft Skills:** Problem Solving, Teamwork, Adaptability, Critical Thinking

## PROJECTS

Front End **Senor Ritas** [www.senor-ritas.com](http://www.senor-ritas.com)  
In this project, I led the creation of a user-friendly interface using Next.js, overseeing cross-functional collaboration with UX/UI designers. Utilizing responsive design, I transformed concepts into dynamic and functional components.

Front End **ReThink** [www.rethinkbuilders.com](http://www.rethinkbuilders.com)  
In this project, I spearheaded the design of an intuitive interface using Next.js. Leading cross-functional collaboration with UX/UI designers, I successfully translated concepts into highly functional components.

Front End **One Green Filter** [onegreenfilter-nextjs.vercel.app](http://onegreenfilter-nextjs.vercel.app)  
As the project lead, I designed a user-friendly interface in Next.js, leading cross-functional teams to create dynamic components. Leveraging responsive design expertise, I ensured the integration of a seamlessly designed frontend with the backend.

Back End **Muscel Dev**  
In this project, I handled backend development, creating an ERD for the entire product. I implemented business logic and secured endpoints by building RESTful APIs using Express.js, with MongoDB as the data store.

Back End **Imperial MoterCar** [www.imperialmotorcars.net](http://www.imperialmotorcars.net)  
In this project, I specialize in data scraping from the old client website and seamless migration into the new database.

## EDUCATION / CERTIFICATE'S

Sep/2018 - **The University of Faisalabad (Engineering Wing)** **University**  
Jul/2022 Bachelor of Science in Computer Science (BSCS)  
**Final Year Project:** "Sign Language Recognition Using Dynamic Hand Gestures by Deep Learning"  
**Paper Publish:** A Real-Time Approach for Finger Spelling Interpretation Based on American Sign Language Using Neural Networks  
International Conference on Computing and Emerging Technologies (IC CET 2023) · Aug 20, 2023

Dec/2021 **Honors Certificate** **ICCCM**  
Won First prize at China-ASEAN Education Cooperation Week 2021-International Invitational Contest of IOT which conduct by ICCCM

## EXPERIENCE

Aug/2022- Present **Speecto Solutions** **Company**

- As a backend engineer, I developed robust and scalable backend systems, designed server-side logic and database architecture, integrated APIs, and collaborated with cross-functional teams to ensure seamless communication between the frontend and backend.  
Node Js / Express Js / MongoDB
- Passionate about comprehensive software development, I transitioned from a backend role to become a Mern Stack Engineer. Proficiently bridging the gap between front-end and back-end, I focus on delivering enhanced user experiences. With meticulous attention to detail, I consistently produce high-quality work.  
React / Next Js / Tailwind Css
